PREFACE.

This book was prepared for the use of my second year classes in the Somerville English High School, and is published because of inquiries by many teachers concerning this line of work. It is not intended as an exhaustive study of Mediaeval History, but as a practical work for the class room. A copy should be placed in the hands of each pupil in order to accomplish the end designed.

As far as possible, references are to one volume editions, these being considered more economical in time to the student and in expense to the school. That there may be no mistake in regard to the edition cited, a list of books has been carefully prepared, giving title, author, publisher, and date of publication. At the close of the book are a chronological table of the rulers of England, France, Germany, and the Holy Roman Empire during the Middle Ages, and a short list of historical works arranged alphabetically by countries.

I have not touched upon theories or ecclesiastical questions more than is necessary for a good understanding of the period, preferring to leave such matters to the discretion of the teacher.

I take this opportunity to acknowledge my indebtedness to those who have aided me in the preparation of this little work.

MERLE S. GETCHELL.

Somerville, Mass.,
August, 1897.

ADVERTISEMENTS

A spirit of quiet but ardent patriotism pervades this book from beginning to end.

LEADING FACTS OF AMERICAN HISTORY

BY D. H. MONTGOMERY.

Half Leather. 365 pages. With full Maps, full-page illustrations, Appendices, etc. For introduction, $1.00.

THE MOST STRIKING FEATURES OF THE BOOK.

1. **The Author.** — The author is Mr. D. H. Montgomery, the eminent and successful writer of historical text-books.

2. **General Plan and Style.**—The general plan and style of this work will be found similar to the other histories by Mr. Montgomery. The main difference is that the American History is adapted for younger pupils.

3. **Leading Events discussed in their true shape and proportions.** — The greatest merit of the book is in the judgment with which the leading events in the development of our country have been selected and the vividness with which they are placed before the reader's mind.

4. **It has been written and not merely compiled.** — The book has been written and not merely compiled. Hence it has an interest and charm like that of a story told by an eye-witness of the events.

5. **Causes fully traced; results adequately shown.** — Not only are the important events clearly and luminously sketched, but their causes are fully traced and the results of all important events adequately shown.

6. **Every subject handled impartially.** — The author has treated all subjects impartially; following the course of events as an eye-witness elevated above the plane of contention.

7. **Accuracy studied.** — Accuracy has been diligently and patiently studied, and investigations of original documents have been made where leading authorities have been found to disagree.

8. **Useful features of the book.** — Every section ends with a brief summary. Copious notes are added with many cross-references. The book contains an unusually large number of maps besides numerous fine engravings carefully selected as historical illustrations. Chronological and statistical tables, a list of reference books, index, questions, the Declaration of Independence, and the Constitution have been added.

Montgomery's Leading Facts of American History is full of thought and intellectual life. It has been pronounced by the educational jury the best text-book on the subject, — accurate, philosophical, unprejudiced, of rare interest, easily handled by teachers, and easily grasped by children.

FULL OF LIFE AND HUMAN INTEREST

HISTORIES

FOR HIGH SCHOOLS AND COLLEGES.

BY PHILIP VAN NESS MYERS,

Professor of History and Political Economy in the University of Cincinnati, Ohio,

AND

WILLIAM F. ALLEN,

Late Professor of History in the University of Wisconsin.

Myers's General History. Half morocco. Illustrated. 759 pages. For introduction, $1.50.

Myers's History of Greece. Cloth. Illustrated. 577 pages. For introduction, $1.25.

Myers's Eastern Nations and Greece. (Part I. of Myers's and of Myers and Allen's Ancient History.) Cloth. 369 pages. For introduction, $1.00.

Myers and Allen's Ancient History. (Part I. is Myers's Eastern Nations and Greece. Part II. is Allen's Short History of the Roman People.) Half morocco. 763 pages. Illustrated. For introduction, $1.50.

Myers's Ancient History. (Part I. is Myers's Eastern Nations and Greece. Part II. is Myers's Rome.) Half morocco. 617 pages. Illustrated. For introduction, $1.50.

Myers's History of Rome. (Part II. of Myers's Ancient History.) Cloth. 230 pages. For introduction, $1.00.

Allen's Short History of the Roman People. (Part II. of Myers and Allen's Ancient History.) Cloth. 370 pages. For introduction, $1.00.

Myers's Outlines of Mediæval and Modern History. Half morocco. 740 pages. For introduction, $1.50.

A philosophical conception of history and a broad view of its developments, accurate historical scholarship and liberal human sympathies are the fundamental characteristics of these remarkable histories. The hand of a master is shown in numberless touches that illuminate the narrative and both stimulate and satisfy the student's curiosity.

Schoolroom availability has been most carefully studied, and typographical distinctness and beauty, maps, tables and other accessories have received their full share of attention.

GINN & COMPANY, PUBLISHERS.

Leading Facts of History Series

By D. H. MONTGOMERY.

A series of sterling text-books on history for schools, academies, and colleges.

The Beginner's American History. Cloth. 234 pages. Fully illustrated with new maps and pictures. For introduction, 60 cents.

The Leading Facts of American History. Half morocco. 365 pages, besides colored maps and full-page illustrations, with an Appendix of 67 pages. For introduction, $1.00.

The Student's American History. For high schools and colleges. Cloth. 523 + lv pages. For introduction, $1.40.

The Leading Facts of English History. Rewritten and enlarged, with maps and tables. Cloth. 445 pages. For introduction, $1.12.

The Leading Facts of French History. Cloth. 321 pages, with fourteen black and colored maps, and full tables. For introduction, $1.12.

Mr. Montgomery's histories are universally acknowledged to be, in their departments, unequalled in scholarship, in true historic insight and temper, in interest and class-room availability. They are admittedly the leading text-books on their subjects. Their popularity and wide use have been duly proportionate to their merits. Hundreds of schools and colleges have introduced them, and all report the greatest satisfaction.

In brief, the attractive and enduring qualities of Mr. Montgomery's books have proved them preëminently superior to all other historical text-books.

Easy Latin for Sight Reading

FOR SECONDARY SCHOOLS.

Selections from Ritchie's "Fabulae Faciles," Lhomond's "Urbis Romae Viri Inlustres," and Gellius' "Noctes Atticae."

Edited, with Introduction, Models for Written Lessons, Idioms, and Annotations,

By B. L. D'OOGE,

Professor of Latin and Greek in the Michigan State Normal College; editor of "Viri Romae," etc.

12mo. Cloth. 146 pages. Illustrated. For introduction, 40 cents.

THIS little book is designed to be helpful to those who desire to do more sight reading in secondary schools. It is intended especially for students who wish to learn to read Latin easily and need an elementary guide.

The author holds that students should be taught to read, and to understand as they read, without translation, from the very beginning. The aim from the outset should be to learn to *read Latin*. This is not so difficult, in the opinion of the author, as it seems, and pupils in secondary schools can with proper instruction acquire considerable facility in this direction.

For a well-graded series of selections for higher schools nothing better can be found than Ritchie's *Fabulae Faciles*, Lhomond's *Urbis Romae Viri Inlustres*, and Gellius' *Noctes Atticae*. The selections of this book have accordingly been made from these three sources. The *Fabulae Faciles* may be used to advantage during the latter half of the first year and the first part of the second; the selections from *Viri Romae* come next in difficulty, and then those from Gellius. It has been the plan of the author to afford sufficient and suitable material for the entire preparatory course. The quantities are marked.

From considerable experience with classes in sight reading, and from the experience and publications of others, Professor D'Ooge has compiled and formulated in a few introductory pages some hints and suggestions that will be found useful in teaching the art of reading Latin. These are followed by a few models for written lessons, which will be of practical use to the young student.

The increasing and very proper emphasis placed upon translation at sight in the curricula of all our best higher schools and colleges has insured a cordial welcome to this little book.

"The best example in this country of the kind of books that geography needs."

The Lakes of North America

By ISRAEL C. RUSSELL,

Professor of Geology in the University of Michigan.

8vo. Cloth. xi + 125 pages. Illustrated.
By mail, postpaid, $1.65; to teachers and for introduction, $1.50.

RECENT advances have made physical geography almost a new science. Professor Russell here presents a single phase, but one of great importance. The work is based upon his original investigations, and is at once thoroughly scientific in substance and enjoyably popular in style.

As a text-book or reading-book for students in geography and geology, the "Lakes of North America" possesses a unique value; its interest to the general reader is enhanced by its pictures and its happy descriptions of lake scenery.

The Nation, *New York:* It is at present the best example in this country of the kind of books that geography needs. In the first place, it is not a compilation, but in great part the result of original study. The author is admirably qualified for his task, having had wide experience in exploration and observation all over our country. . . . It is good fortune for geographical readers to have one so well equipped by his own researches turn to their presentation in popular form.

J. J. Stevenson, *Professor of Geology, University of the City of New York:* It ought to be inviting, not to the geologist only, but also to the well-informed man desiring to become familiar with the notable features of his country, for one rarely finds scientific discussion so well and so clearly put.

Glaciers of North America

By ISRAEL C. RUSSELL,

Professor of Geology in the University of Michigan,
Author of "Lakes of North America."

8vo. Cloth. x + 210 pages. Illustrated.
By mail, postpaid, $1.90; to teachers and for introduction, $1.75.

RECENT explorations have shown that North America contains thousands of glaciers, some of which are not only vastly larger than any in Europe, but belong to types of ice bodies not there represented. In the study of the glaciers of North America, and especially of those in Alaska, Professor Russell has taken an active part, and this book not only presents the results of his own explorations, but a condensed and accurate statement of the present status of glacial investigations. Its popular character and numerous illustrations will make it of interest to the general reader.

Edwin S. Balch, *Vice-President Geographical Society of Philadelphia:* It is by all odds the clearest work on glaciers in general that I have ever seen.

F. Bascom, *Department of Geology, Bryn Mawr College, Pa.:* No one is better fitted than Professor Russell, by extended personal explorations, to discuss with authority this subject. His volume combines in an unusual degree a clearness and fascination of style with a thoroughly scientific treatment.

Henry F. Osborne, *American Museum of Natural History, New York, N.Y.:* I consider it a contribution of very great value. By bringing together all that is at present known upon the glaciers of North America in convenient form, this work will stimulate the study of our own living glaciers among American geological students and thus accomplish a marked service to American geology.

ALLEN AND GREENOUGH'S

SHORTER LATIN GRAMMAR

FOR SCHOOLS AND ACADEMIES.

Condensed and Revised by Professor JAMES B. GREENOUGH, Assisted by ALBERT A. HOWARD.

12mo. Cloth. 371 pages. For introduction, 95 cents.

Space does not allow here a full description of this book, but attention is called to the following points :

First. Allen and Greenough's Shorter Latin Grammar does not attempt the impossible. It does not aim to be at once a brief grammar and a full one, to cover both preparatory and college Latin courses in a space sufficient for only the former.

Second. The reduction of size is secured not by retaining arbitrarily what one or two scholars deem essential, but by ascertaining minutely what points are involved in the study of preparatory Latin. It must be admitted that any one who attacks the problem in this way will find that a great deal more information is required for thorough reading of the preparatory texts than any *a priori* maker of a short Latin grammar would suppose.

Third. It has been found entirely feasible to follow the section numbering of the large Allen and Greenough Grammar, so that the full and the short grammars can be used in the same classes and the same set of references apply. If a class includes boys who are going to college and also boys who are not, the former may purchase the full grammar and the latter the short one.

Fourth. The Latin grammar that shall be thoroughly satisfactory under all the conditions it is to meet in thousands of schools of every sort, must be a growth, and it is believed that the experience of making a full and complete grammar and of watching the use of it in schools for years, is almost a prerequisite to the preparation of a thoroughly satisfactory small one.
